

SEALOCK SL

BARRIER SEAL

Sealock's classic design, the SL combines locking and sealing functions in one single-use, high-strength barrier device like no other on the market. Stronger than a cable seal, the 100% steel J-Bar provides additional protection against opportunistic smash-and-grab break-ins, while still delivering the Sealock hallmark tamper-evident characteristics that prevent covert attacks.

Fully compliant with ISO 11712:2013, including Clause 6 Tamper Evidence standards. CTPAT and AEO compliant.

APPLICATIONS

- Rail Cars
- High Value Shipments
- Containers
- Truck & Trailer Doors
- Intermodal Containers
- Swing Doors

FEATURES

- Available as a Standard Product
 - Order online and GET IT NOW, FOR LESS!
- Dual-function, hybrid device: provides sealing and locking functions simultaneously to protect against covert attacks
- High-strength device provides additional protection against opportunistic smash-and-grab break-ins
- Corrosion-resistant, tamper-evident baked-on enamel finish
- Serial numbering on all components (J-Bar, lock body, seal flag)
- Innovative design continually improved over 20+ years
- Requires 2 cuts for removal (suggested removal: angle grinder + cable cutter)

MATERIAL

- Locking Bar (J-Bar): 100% environmentally friendly recycled steel
- Lock Body: Aluminum alloy and environmentally friendly recycled steel components
- Cable: Galvanized steel braided aircraft cable with hardened steel bullet tip
- Seal Flag: Anodized aluminum alloy

DIMENSIONS

Cable Diameter: 1/8" (3.2mm)
 Standard cable length: 15" (381mm)
 Bar Length: 19 3/4" (500.38mm)
 13 Locking positions over 8 1/2" (215.9mm)

SP = Standard Product
