

Developed specifically to meet the needs of those responsible for the secure transportation of high value goods and merchandise. This 'self-voiding' material separates permanently as a de-lamination if attempts are made to lift or remove it.

Offering resistance to extreme cold and heat including operation in humid conditions, it is easy to handle with no inadvertent damage to the security message during application.

These tamper evident seals can be used on all carton fibre and plastic packaging also confidential documents and correspondence.

- Supplied in reels of 1000 with backing liner perforated between each seal for easy
- Customised design text or logo together with optional sequential numbering.
- Three basic sizes available but any shape or size of seal can be supplied to customer
- Supplied in red as standard but other colours are available for larger quantity orders.
- Smooth, matt 'write-on' face material.
- Stock seals available in two sizes.
