## KR - Removable residue VOID seal

This is an improved version of the highly popular Type K security seal. There is a VOID/OPEN security message, which shows clearly when the seal is lifted, whilst this remains on the application surface it can easily be removed or a replacement seal can be positioned over the residue. The aggressive adhesive backing makes this seal suitable for use on all surfaces in applications where it is necessary to control access or usage, also to indicate unauthorised interference.

- Supplied in reels with backing liner perforated between each seal for easy use.
- Customised design text or logo together with sequential numbering are standard.
- Whilst there are 4 basic sizes available, any shape or size of seal can be supplied to
- Supplied in red as standard but other colours are available for larger quantity orders.
- Stock seals available in two sizes.
