

MRP2 - Polyester foil high tack seal

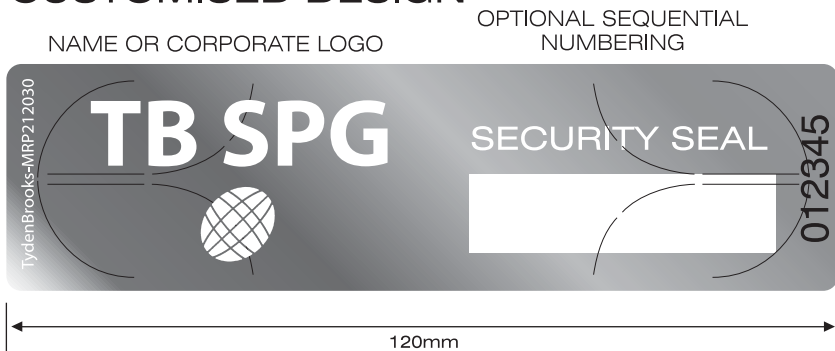

This distinctive multi-purpose seal is an extremely thin, but strong polyester foil which has a very high tack rubber based adhesive backing. The seal is designed for use on smooth or uneven also porous or non-porous surfaces. Whilst the face material has a high tensile strength it will break easily around the security cuts if tampered with. In most cases any seal residue can be easily removed from the sealed surface.

Effective on street furniture, internal doors and hatches, luggage, security containers, trunking and meters, first aid boxes also and sensitive equipment.

- Supplied in reels with backing liner perforated between each seal.
- Double interlocking security cuts.
- Customised design text or logo with optional sequential numbering.
- There are four preferred sizes but any shape or size can be supplied to customer requirement.
- Stock seals are available in two sizes.
