- 7/ Lids (> 2,3L) with a larger hole for seringes with safety cap
- 8/ Can be customized with logo's, instructions in various languages, ...

Container volume 0,2L / 0,3L (useable volume 0,17L / 0,26L)
 H124xW87xD42mm / H142xW87xD42mm
 200 packed together
 Complies with UN 3291, NFX 30-500
 Permanent or temporary closure
 Puncture resistant
 Leak proof in vertical position
 Lid fitted with seringe removal notches
 No toxic emission when incinerated
 Polypropylene (PP)

Container volume 0,75L/1,15L/1,5L/2,3L/3,2L/5L/7L/8,5L/10L
 Useable volume 0,69L/1,05L/1,4L/1,8L/2,7L/4,4L/5,9L/7L/8,5L
 H140/190/240xW106xD61mm / H169/229/337xW193xD122mm ...
 Packed in 70/65/60/45/30/25/20/17 units
 Complies with UN 3291, NFX 30-500, BSN 7320-1990
 Permanent or temporary closure
 Puncture resistant, leak proof in vertical position
 Lid fitted with seringe removal notches
 Lid designed with "non-return" system
 Base can fit any universal holding rail
 No toxic emission when incinerated (PP)
 Stackable in VAT4 medical waste containers

3-layer cardboard box with inner plastic bag
Volume 10L/20L/25L/40L/50L
H250xW210xD210mm, H360xW280xD210mm ...
Complies with UN 3291, NFX 30-507
Permanent or temporary closure
Handles for manual transport
Definitive closing seal for inner bag
No toxic emission when incinerated
"Biological Hazard" sign

Medical waste container
Volume 30L / 50L / 60L
H290/490/560xW400xD400mm
150 units per pallet
Complies with UN 3291
Available in 6 colors
Lid and container fitted with handles
Lid connected to container with hinges for better stability
Airtight locking system with special silicone gasket
No toxic emission when incinerated
