

SEALOCK SL-C

CABLE SEAL

Tamper-evident intelligent design in a cost-effective lightweight package, the SL-C functions like a traditional Sealock in streamlined cable seal form. The SL-C protects against covert attacks while exceeding CTPAT standards for High Security (H) seals. All in 1 compact device.

Fully compliant with ISO 11712:2013, including Clause 6 Tamper Evidence standards. CTPAT and AEO compliant.

APPLICATIONS

- Rail Cars
- High Value Shipments
- Containers
- Truck & Trailer Doors
- Intermodal Containers
- Swing Doors

FEATURES

- Available as a Standard Product
 - Order online and GET IT NOW, FOR LESS!
- 1-piece device means no loose/lost parts, ever
- Dual-function, hybrid device: provides sealing and locking functions simultaneously to protect against covert attacks
- Anodized finish protects against elements and provides tamper evidence
- Corrosion-resistant galvanized steel braided aircraft cable frays when cut, making covert re-welding impossible
- Requires 2 cuts for removal (remove with cable cutters)

MATERIAL

- Lock Body: Anodized aluminum alloy
- Cable: Galvanized steel braided aircraft cable

DIMENSIONS

Cable Diameter: 3/16" (5mm)
 Primary cable length: 48" (1219.2mm)
 Secondary cable length: 12" (304.8mm)

SP = Standard Product
